| Company Overview    | <div style="border: 1px solid red; padding: 10px;"> <p><b><u>The history</u></b></p> <p>Feb., 1985: Established in Hiroshima, Mihara city</p> <p>Jul., 1987: Opened a 'Shikoku' business office in Ehime Nihama city</p> <p>May, 1996: Moved headoffice into present location</p> <p>Feb., 2005: Opened a 'Mihara' business office in Mihara city</p> <p>Apr., 2010: Moved 'Shikoku' business office in Kagawa, Takamatsu city</p> <p><b><u>Management philosophy</u></b></p> <p>In 1985, as a ideology 'Doing the net in the future with dream and pride',</p> <p>We are proud of our many achievements as consulting that help startup the cable stations that can be independent of construction department of cable stations, focusing on Western Japan after we startup. Since we have constructing section, we have got client's trust as the company which can be able to respond to the cable station's request with One-stop service.</p> <p>Especially, we specializes high-difficulty jobs like prime constructing of building moves which is in the operating. Moreover we do business proposing considering managing condition of cable stations. The cable stations where we have consulted, are practically small scale in region, but their managing condition is quite good.</p> </div> |           |                   |

|                                     |   |
|-------------------------------------|---|
| Selling (Strong) Point              | <p>In addition to consulting, architecture, construction management, sale of system equipments, we are developing shopping support system tools. Since we started, we gained experience and know-how in the business of telecommunication of field construction technology, sound-proof studio construction, broadcasting system construction, membership managing system, etc. We are actively developing and researching for the near future services by executing field experiments. We are especially working diligently on developing an application for smart phones for the Diabetes Prevention Support System by using ICT. We have just launched the development of our system with the association of the Universities, Doctors Association, and the Community Association.</p> |
|                                     | <p><b>【Our Strong Points】</b><br/> ①We are a multi-task engineering consulting company. Providing all maintenance and services for your every need. We provide everything from telecommunications to cable tv operation.<br/> ②Our customers are the NUMBER 1 priority. We offer you the best and most useful services within your budget.</p>  |
|                                     | <p><b>【Products and Services we want to expand in Saudi Arabia】</b><br/> Sale of Diabetes Prevention and other lifestyle related disease support system. Not only people who are suffering from the disease but also to people who don't have the disease by using and maintaining this support system.</p>   |
| Motive and purpose for Saudi market | <p>From my understanding, there are serious social problems with in Saudi Arabia such as diabetes, obesity, and lack of exercise due to Westernization. By using our Prevention support system, we would like to help and support those in need to live a healthy and long life. It is essential to manage your health and exercise to prevent diabetes. By using our ICT support system, it will encourage users to exercise and manage your health through numbers and graphs. Through our system, we expect a rise in the average life span of Saudi Arabian people and reduce medical insurance costs. We believe that we can contribute to the society members who are suffering of diabetes and other diseases by using our system.</p>   |
| Interest and wish to Saudi          | <p>In order to use our support system we need to research and analyze the daily eating habits of the Saudi Arabian people. We need the support of Universities and the Doctor's Association. We really hope that we can gain support from your Government, Medical, Universities, and Industries.</p>   |
